

RSA SecurID Appliance 3.0

Delivering Convenient and Cost-effective Two-factor Authentication to Companies of All Sizes

The RSA SecurID Appliance delivers the full functionality of RSA Authentication Manager in an integrated, rack-mountable hardware appliance. Used in combination with RSA SecurID Authenticators, the RSA SecurID Appliance validates the identities of users before granting access to critical company resources. The RSA SecurID 3.0 will be offered in two models:

The RSA SecurID Appliance 130 (A130) is a 1U form factor that will replace the existing RSA SecurID Appliance 2.0. This platform is well-suited for companies of any size.

The RSA SecurID Appliance 250 (A250) is a new addition to the product family. This 2U form factor with redundant hardware components is targeted at Enterprise customers with high availability requirements.

Summary Platform Comparison

	RSA SecurID Appliance 130	RSA SecurID Appliance 250
Vendor	Dell	Dell
Software	RSA Authentication Manager v7.1	RSA Authentication Manager v7.1
Operating system	rPath Linux	rPath Linux

Pricing

The price for the new RSA SecurID Appliance 130 is very similar to the current pricing of the RSA SecurID Appliance 2.0 but offers significantly value by including 3 years of Advanced Hardware Maintenance in the base price*. The RSA SecurID Appliance 250 provides both power and disk redundancy and is ideal for primary and larger replica server deployment. It also includes 3 years of Advanced Hardware Maintenance in the base price*.

	RSA SecurID Appliance 130 (includes 3-year AHR)	RSA SecurID Appliance 250 (includes 3-year AHR)
*Year 4 and Year 5 of Advanced Hardware Maintenance is purchased separately		
U.S. list price	\$2,995	\$9,495

Upgrades and Conversions

For a limited time only, RSA is offering a special Appliance trade-up program for existing Appliance customers. The Appliance trade-up program includes discounted pricing for both the A130 and A250 platforms. The discounted pricing makes upgrading to Authentication Manager 7.1 an attractive option for existing Appliance customers.

Eligibility: Existing Appliance customers are eligible for upgrade pricing on the new 3.0 Hardware.

Availability: Special discount pricing is available through June 30, 2009.

	RSA SecurID Appliance 130 (includes 3-year AHR)	RSA SecurID Appliance 250 (includes 3-year AHR)
U.S. list price	\$2,995	\$9,495
U.S. upgrade list price	\$2,495	\$6,995

Appliance Conversion Kit

Conversion kits are available for Authentication Manager software customers who want to convert to the Appliance platform. Contents Include:

- RSA authentication Manager 7.1 pre-installed on either the A130 or A250
- Documentation and migration guide for converting an Authentication Manager installation to an appliance
- License Conversion – The Authentication Manager license will be deactivated and a new Appliance Software license will be activated; Software Maintenance will be transferred to the new license
